

CIP 300™ Neutral pH Cleaner is phosphate free and can be used as a stand alone detergent or detergent additive. It serves the pharmaceutical, biotechnology, cosmetic, nutraceutical, and other industries requiring effective, validatable cleaning. This low-foaming product is ideal for use in recirculating wash systems and safe for use in manual applications. CIP 300 Cleaner is compatible across a wide array of substrates including aluminum, brass, and other soft metals. An extensive support package is available to meet your validation objectives.

## CIP 300™ Neutral pH Process and Research Cleaner

### Features

Neutral pH

High level surfactant system

Easily rinsed from surfaces

Complete lot and change control traceability

Manufactured within an FDA registered, ISO 9001:2015 and ISO 13485:2016 compliant

### Benefits

Environmentally friendly and safe for manual cleaning

Penetrates, dissolves, and removes a broad spectrum of soils

Minimizes utility and water consumption

Supports quality assurance and control

Meets the highest standard in manufacturing and quality assurance

### Applications

- Processing Equipment
- Cleaning
  - » Process Vessels
  - » Reactors
  - » Blenders
  - » Tableting Presses
- Manual Cleaning
- Component Part Cleaning
- Ultrasonic Washing
- Laboratory Glassware

## Technical Support

A highly qualified, industry-recognized team of chemists, microbiologists and engineers are available to offer product and process consultation. STERIS Technical Support currently provides both on- and off-site seminars with topics focusing on process cleaning and cleaning validation. An extensive library of technical data, laboratory reports, analytical methods and case studies have been developed including toxicity and substrate compatibility studies.

## PACE™ Program

Our technical support services also include the Process And Cleaner Evaluation (PACE) program, which is an evaluation service designed to provide our customers with recommendations for an effective cleaning protocol. Once an evaluation has been completed, STERIS provides a report that assists customers in developing a cleaning protocol by defining parameters based on chemical type, concentration, cleaning time, temperature, cleaning method and water quality. The PACE program is an essential first step for any cleaning application.

## Physical Properties

Form	Slight yellow, clear liquid
Odor	Mild
Specific Gravity 25 °C (77 °F)	1.04, typical
pH (undiluted)	7.8, typical
Solubility	Complete
Foam	Low
Phosphates	None
